Executive Summary

Avalanche Multi Dynamics Services Limited is pleased to present you with this product sales proposal. We understand your need as to administer computer based examination at your flexible time and space; be it for your internal examination for your students or external examinations for your prospective students

Having duly examined your needs and the university structure, we are confident that this product (Avalanche Flex) will effectively address your needs, and consequently, boost your school national recognition, reduce examination administration cost and boost academic reliability. Our goal is to present you, the modalities, value offering and pricing at which Avalanche Flex works.

Company Background

Avalanche Multi Dynamics Services Limited (doing business as yatice.com) is a registered company that spreads its operation in brands like Avalanche Nigeria (avalanchenigeria.com), Yatabox (yatabox.com), and Examtone (examtone.com). The company main point of concentration is in the educational sector (Avalanche Nigeria and Yatabox), and in online assessment system (Examtone). We have worked with various learning institutions in the deployment of our educational solutions.

Avalanche Nigeria as earlier listed is one of the company's educational solutions providing arm. Its major product is the Avalanche PK Software, which is strictly a CBT software design to acclimatize university prospects into the platform environment. The software has thus spread round the nation with over ten thousand (15,000) direct users and over one hundred thousand (200,000) indirect users.

Yatabox (yatabox.com) is the CBT software for all examinations. It is a software designed to enable students writing various prerequisite exams (Common Entrance, JSCE, SSCE, JAMB UTME) and Professional exams (SAT, TOEFL, IJMB, MBBS and so on) to Practice, Learn, Discuss and Assess themselves in any examination they are preparing for. This brand is available on Windows, Mobile and on Web platforms.

Examtone (examtone.com) is an online assessment software that allows examiners set examinations anywhere in the world. The resulting outcome is that the examinees can also sit for the exam anywhere in the world. It eases the stress of creating and administering examinations anywhere and anytime in the world. It obviates the appearance of both the examiner and examinees.

VALUE OFFERING

Avalanche Flex is designed to be flexible to accommodate institutions of learning or organizations to input their choice questions in a CBT platform, and to administer examinations. For better relevance, avalanche flex is designed into three different software interfaces, and each having different functions namely:

- Exam Loader
- Exam Suite – Flex Server and Client

Exam Loader: Serves as CBT question bank maker, where questions can be typed and imported from (PDF format and Microsoft words format) or as questions formatting editor. It is the only recognized CBT question maker or editor for Flex Server. Exam loader interface is very easy and simple to use, with very interactive tools that are needed to compile CBT questions at all academic or organizational levels.

Some Tools under Exam loader

- Text Editor - *to edit your CBT questions*
- Graph Plotter – *to make various graphs ranging from Bar chart to Well Log Chart*
- Table Maker – *to prepare tables*
- Graphics Editor – *to import and edit your bitmap images and create basic vectors shapes*
- PDF extractor – *extract your existing examination questions in .pdf format to use in exam loader*
- Microsoft Words extractor – *extract your existing examination questions in .docx format to use in exam loader*
- Import wizard – *automatically converts your existing examination questions in .docx or .pdf to flex document type*
- File Encryption tool – *prevent your questions from being viewed or used by unauthorized user.*

- Authors metadata editor – *watermark your questions with your details.*

Exam Suite: comes in pack with the exam loader. It is network driven whereby it has server - client relationship (Client software installed on every potential client systems and the server software on the system assigned for server) wired or wirelessly connected.

Questions to be administered from the server to the clients can be accessed in two ways:

- From the Exam loader
- From the Market place

The server end of the suite does the major administering of the process, from examinations settings to tracking, while the client end consumes what the server feeds it. The major functionalities of the server end are:

- Customize the Computer Based Examination Software to your institution
- Manage examinees details and registration of examinees
- Export Examinees' details to Microsoft Office excel
- Provides graphical examinee's performance for series of examination
- Provides Market Place to download existing CBT questions to use for examination in case where user is not opportune make his own questions
- Examination Monitoring Service
- Result Export to Microsoft Office Word, Excel, .Pdf and to print
- Provides three types of examination interfaces- Quick, Standard and Split.
- Manages Avalanche Flex Client behavior and functionalities
- Provides Auto-Backup function in case of power outage
